

# Tamigo – your online roster!

## Company profile

---

Tamigo supplies Denmark's leading online roster solution for the retail industry. Since its establishment in 2004 Tamigo has experienced consistent growth. One reason for this success is the talented and experienced team behind the product. Tamigo's founder, Jakob Toftgaard, has deep roots in the consulting and IT industry. Working with some of the largest companies in Denmark, his expertise is built on IT solutions that increase efficiency and improve processes. What's more, Tamigo's sales team and consultants have both practical *and* theoretical knowledge about the scheduling challenges their customers face. Tamigo's headquarters are in Lyngby, Denmark and development takes place in Poland.

## Goal

---

Our goal is clear: We want to ease the burden on companies that have part-time employees and shift schedules. We want to save time and create an overview for the personnel that create the schedules and we want to make the schedules accessible to all employees in the organization.

## Vision

---

- We will constantly develop and improve our product in consultation with our customers.
- We will continue to be Denmark's leading supplier of online roster solutions to the retail industry.
- We will expand internationally within the coming years.

## Commitment

---

**Economic:** We will continue to set high goals for growth and value creation. Staying on the leading edge of technology is the key to remaining competitive in our field and is essential to our success.

**Environmental:** Web based solutions like Tamigo benefit the environment. That's because many customers share resource usage instead of all individuals having their own copy of the software installed on their own servers or PCs.

## Customers

---

Tamigo can be used in all organizations that operate with part-time employees and/or shift scheduling. Most of Tamigo's customers are retail organizations, including:

- Shell
- 7-Eleven
- Sv. Michelsen
- ParadIS
- Wunderwear
- Sunset Boulevard
- REMA1000
- Spejdersport
- Sticks'n'Sushi

Focus will continue to be placed on retail businesses plus additional organizations with part-time employees.

## Investors

---

Seed Capital, a well known investment fund, stands behind Tamigo. Read why they choose to invest in Tamigo at [www.SeedCapital.dk](http://www.SeedCapital.dk). Tamigo also has private investors that contribute with experience and expertise regarding the retail industry and sales leadership.
